Sasha Rubin – Curriculum Vitae 2.2017

1 Personal Details

Affiliation: University of Naples "Federico II", Italy.
Nationality: New Zealand
Email: rubin@unina.it

2 Education

PhD Department of Mathematics and Department of Computer Science 2004
University of Auckland, New Zealand.
Supervisor: Bakhadyr Khoussainov
Title: Automatic Structures
Awards: Prize for the best doctoral thesis in the Faculty of Science, and Montgomery memorial prize in logic from the Department of Philosophy.

MSc Department of Mathematics and Department of Computer Science 1998
University of Auckland, New Zealand.
Award: First Class.

BSc Department of Mathematics and Department of Computer Science 1997
University of Cape Town, South Africa
Award: Dean's Merit List.

3 University Positions

Postdoctoral Researcher 03.2015 – 03.2017
University of Naples "Federico II", Italy.
Marie Curie fellow of the National Institute of Higher Mathematics (INdAM "F. Severi").
INdAM-COFUND-2012, FP7-PEOPLE-2012-COFUND, Proj. ID 600198.

Postdoctoral Researcher 03.2014 – 02.2015
Institute for Information Systems, Technical University of Vienna, Austria and Institute of Applied Information Processing and Communications, Technical University of Graz, Austria.

Postdoctoral Researcher 03.2012 – 03.2014
Institute for Information Systems, Technical University of Vienna, Austria, and IST Austria

Visiting Researcher 05.2010 – 03.2012
Department of Computer Science, University of Auckland, New Zealand.
Including research visits to: Tel Aviv University, Israel; University of Naples, Italy; University of Paris Diderot, France.

Visiting Lecturer   02.2010 – 05.2010
Department of Mathematics, University of Cape Town, South Africa.

Visiting Researcher   12.2009 – 02.2010
Department of Computer Science, University of Auckland, New Zealand.

Visiting Assistant Professor   08.2008 – 12.2009
Department of Mathematics, Cornell University, USA.

Honorary Research Fellow   12.2004 – 08.2008
Department of Computer Science, University of Auckland, New Zealand.
New Zealand Science and Technology Postdoctoral Fellowship UOAX0413.

4   RESEARCH

I work in formal methods, a branch of theoretical computer science, and study the power of automata theory (broadly construed) and mathematical logic for describing, reasoning and controlling systems.

Classification   ACM Computing Classification System: Theory of Computation [Models of Computation, Logic, Formal Languages and Automata Theory]; Computing Methodologies [Planning and Scheduling, Knowledge Representation and Reasoning]

Mathematics Subject Classification: 03Bxx (General Logic), 03Cxx (Model Theory); 68Qxx (Theory of Computing), 68Txx (Artificial Intelligence)

Main Areas

Formal methods (Modeling, Verification, Synthesis) of Multi-agent Systems; Logics for Games and Strategic Reasoning; Foundations of Planning; Automata Theory; Finite and Algorithmic Model Theory.

Accomplishments

During my PhD I (and my co-authors) pioneered the development of the theory of automatic structures. My most cited publications in this area are: [32] (94 citations; all citation counts are as reported by Google Scholar) and [27] (85 citations). My PhD thesis (67 citations) was awarded the Vice-chancellor's prize for the best doctoral thesis in the Faculty of Science, and Montgomery memorial prize in logic from the Department of Philosophy.

I was then awarded a prestigious New Zealand Science and Technology Postdoctoral Fellowship. During this fellowship, I published a survey and extension of the main results in my thesis in the Bulletin of Symbolic Logic [27], and I (with a PhD student of Erich Grädel's) solved a 12 year-old conjecture of Courcelle's [25].

In the last few years, I (with my co-authors) generalised a cornerstone paper on verification of parameterised systems ("Reasoning about Rings", E.A. Emerson, K.S. Namjoshi, POPL, 1995) from ring topologies to arbitrary topologies (34 citations) [17]. We also completed a book, published by Morgan & Claypool, surveying decidability results in parameterised verification [14].

Recently, I was awarded a two year Marie-Curie fellowship from the Istituto Nazionale di Alta Matematica to work on formal methods for parameterised light-weight mobile

agents. I opened this direction with [16]. Subsequently (with my co-authors) I continued this direction and published in top rated conferences [4], [11] and won a best-paper award [15] (invited to JAAMAS.)

5 Awards and Distinctions

– 2 postdoc individual fellowships (Marie Curie fellow of INdAM, New Zealand Science and Technology Postdoctoral Fellowship).

– 2 PhD prizes (best doctoral thesis in the Faculty of Science, Montgomery memorial prize in logic from the Department of Philosophy).

– 6 Invited Workshop-Talks

– *Finite and Algorithmic Model Theory*, Les Houches, France	05.2012
– *Automata theory and Applications*, IMS programme, Singapore	09.2011
– *Computational Model Theory*, CNRS SIG, Bordeaux, France	06.2008
– *Algorithmic-Logical Theory of Infinite Structures*, Dagstuhl, Germany	10.2007
– *Finite and Algorithmic Model Theory*, Newton Institute, England	01.2006
– *Workshop on Automata, Structures and Logic*, Auckland, New Zealand	12.2004

– Competed as part of a team of three, in the world finals of the 1998 ACM Programming Contest in Atlanta, Georgia USA, representing the University of Auckland and New Zealand.

6 Recent Research visits

– Host: Mike Wooldridge, Oxford University Topic: Rational Synthesis	03.2016, 01.2017
– Host: Alessio Lomuscio, Imperial College London Topic: Strategic-Epistemic logics for Multi-Agents Systems	03.2016, 01.2017
– Host: Diego Calvanese, University of Bolzanno Topic: Data-aware strategic logics Topic: Knowledge Representation for Business Process Management	07.2016
– Host: Frank Stephan and Sanjay Jain, National University of Singapore Topic: Learning Theory and Verification	05.2016
– Host: Giuseppe De Giacomo, Sapienza, Rome Topic: Synthesis under Assumptions Topic: Generalised Planning with Partial Observability	12.2015
– Host: Helmut Veith, TU Wien Topic: Logic and Impossibility Results in Distributed Computing Topic: Abstractions for Fault-tolerant Distributed Algorithms	08.2015

7 TEACHING AND SUPERVISION

I have a passion for teaching, and a proactive approach to learning best-practices. I spent 1.5 years teaching undergraduate calculus at Cornell. I sought out a number of teaching mentors, including Maria Terrell (Department of Mathematics) and David Way (associate director of the Cornell University Centre for Teaching Excellence) to discuss successful teaching strategies, both philosophical and concrete. As a result, according to my student evaluations, I was clear, organised, proactively willing to help, and motivating.

I have a strong record of undergraduate supervision. While at Cornell I mentored six students for three months in a research programme. This resulted in two publications [20], [22] and gave students a taste of research to help them decide if they should pursue a PhD. While at IST Austria I co-mentored one intern which resulted in [21]. While in Naples, I worked closely with two PhD students, resulting in [2], [3], [9].

Teaching

- Logic and Computation (undergraduate)   2010
  University of Cape Town, Department of Mathematics

- Logical Definability and Random Graphs (graduate)   2009
  Cornell University, Department of Mathematics

- Totally Awesome Mathematics (undergraduate)   2009
  Two interactive lectures:
  i) Hilbert's Hotel and Infinite Cardinals
  ii) Algorithms and Termination
  Cornell University, Department of Mathematics

- Calculus for Engineers (undergraduate) $2008 - 2009$
  Cornell University, Department of Mathematics

- Discrete Structures in Mathematics and Computer Science (undergraduate)   2007
  Mathematical Foundations of Software Engineering (undergraduate)
  University of Auckland, Department of Computer Science

- Logic and Computation in Finitely Presentable Infinite Structures (co-taught five day advanced course)   2006
  European Summer School in Logic, Language and Information

- Introduction to Formal Verification (advanced undergraduate)   2003
  University of Auckland, Department of Computer Science

- Automata Theory (undergraduate)   2002
  University of Auckland, Department of Computer Science

- Pre-calculus (undergraduate)   2001
  University of Wisconsin, Madison, Department of Mathematics

Supervision

- Summer undergraduate project   2012
  Topic: Edit-distance and Formal Languages.
  IST Austria

- Summer research experience for undergraduates (REU)   2009
  Topic 1: Parity Games.
  Topic 2: Automatic Structures with Advice.
  Cornell University, Department of Mathematics

8   RECENT SERVICE

- I am co-chair of the Italian Conference on Theoretical Computer Science (ICTCS) 2017, and assistant to the organisers of the Italian Conference on Computational Logic (CILC) 2017.

- I am a PC member of the International Joint Conference on Artificial Intelligence (IJ-CAI) 2017, the AAAI Conference on Artificial Intelligence (AAAI) 2017, the International Workshop of Strategic Reasoning (SR) 2016, the International Symposium on Games, Automata, Logics and Formal Verification (GandALF) 2016, and the European Conference on Artificial Intelligence (ECAI) 2016.

- I co-organised the First Workshop on Formal Methods in AI (FMAI) 2017.
  https://sites.google.com/site/fmai2017homepage/home

- I am a Program Committee member for IRISA Masters Research Internship 2016-2017.

- Between 2013 and 2016 I was involved in reviewing and assisting with the Handbook of Model Checking, to be published by Springer, and edited by Edmund Clarke, Thomas Henzinger and Helmut Veith.

- In 2014, I assisted Helmut Veith with writing and editing consortium grant applications and reports.

- In 2014, I volunteered for the Vienna Summer of Logic, the largest event in the history of logic.
  http://vsl2014.at/

- In 2012/2013 I was one of the organisers of the IST Austria Young Scientist Symposium on the topic 'Understanding Shape: *in silico* and *in vivo*'.
  ist.ac.at/young-scientist-symposium-2013/

- In 2012 I formed and ran the computer science seminar at IST Austria whose goal was to foster collaborations within the institute between computer scientists and, at the time, biologists.
  ist.ac.at/computer-science-seminar/

- In 2010 I briefly volunteered at a secondary school in Accra, Ghana, teaching, observing and commenting on grade 5 mathematics classes. I also briefly volunteered in Khayelitsha, South Africa, helping high-school students prepare for their mathematics exams.

- I have reviewed for the following:
  Journals: Artificial Intelligence, Journal of Symbolic Logic, Logical Methods in Computer Science, Theory of Computing Systems, Central European Journal of Mathematics, Information and Computation, Journal of Logic and Computation, Annals of Mathematics and Artificial Intelligence, Theory and Practice of Logic Programming.
  Books: Handbook of Model Checking.

Conferences:KR, AAMAS, AAAI, EUMAS, ECAI, LICS, STACS, ICALP, MFCS, CONCUR, CSL, FoSSaCS, FSTTCS, SR, KRR@SAC, CiE, GandALF, RV, LPAR, LATA.

10 Refereed Publications

I have 37 refereed publications, most in top conferences and journals, including 1 (co-authored) book, 1 (sole authored) book-chapter, 8 journal articles (5 of them invited), 4 LICS papers, 4 AAMAS papers, 3 STACS papers, 1 IJCAI paper, 1 KR paper, and a best-paper at PRIMA. Not listed, are 6 invited journal articles (in preparation or under evaluation) and an invited chapter in a handbook on automata theory and applications (J.E. Pin (ed.), to be published by EMS).
